

Abstract

5 This invention provides a disposable contact lens package comprising a base
having a top surface and a recessed well having a perimeter in the top surface, said well
for holding said contact lens therein, said top surface comprising a raised seal volume
surrounding said perimeter of said recessed well said raised surface having a cross-
sectional shape comprising two linear sides that intersect the horizontal plane at angles
alpha and beta, respectively, wherein angles alpha and beta independently have values
from 125 to 170 degrees; and wherein said package further comprises a removable
10 lidstock sealed to said raised seal volume.
